

LIPOLITICS & RESHAPERS

("soap effect")

MESOCOCKTAIL

DRAINAGE^{/01} 5x5 ML

Ref: 102834s

ACTION

drainage^{/01} is an intense anti-cellulite formula designed to treat the body in areas with tendency to fat cells accumulation and cellulites development. Synergistic actuation of sodium deoxycholate and quillaja saponaria allows more effect with less concentration.

INGREDIENTS

Sodium deoxycholate, Quillaja saponaria, Urea, Tocopheryl acetate, Ruscus extract, Hammamelis extract.

BENEFITS

- Activates lipolysis
- Decreases fat cell thickness
- Reduces cellulites appearance
- Prevents adipocytes growth
- Activates microcirculation

MESOCOCKTAIL

SILHOUETTE^{/02} 5x10 ML

Ref: 102827s

ACTION

silhouette^{/02} is a concentrated lipolytic solution designed to treat locally fat excess. It actively remodelates and defines body shape. Our formula allows while activating lipolysis at the same time stimulates microcirculation and anti-oxidant activity

INGREDIENTS

Sodium deoxycholate, L-Carnitine, Urea, Tocopheryl acetate.

BENEFITS

- Activates lipolysis
- Decreases fat cell thickness
- Prevents adipocytes growth
- Reshapes silhouette
- Reduces double chin

Acting as a increase energy demand ("fat burners")

MESOCOCKTAIL

DRAINAGENN^{/14} 5x5 ML

Ref: 102971s

ACTION

drainagENN^{/14} is an intense anticellulite formula designed to treat the body in areas with tendency to fat cells accumulation and cellulites development. Special mixture of substances from plant origin, extracted in an appropriated method that allows to increase their activity as well as complementary substances that stimulates microcirculation give an excellent final result.

INGREDIENTS

L-carnitine, Caffeine, Hydrocotyle asiatica, Ginkgo biloba, Glycerin, Vitamin E, Biotin, EDTA, Methylsilanol mannuronate, Ruscus extract.

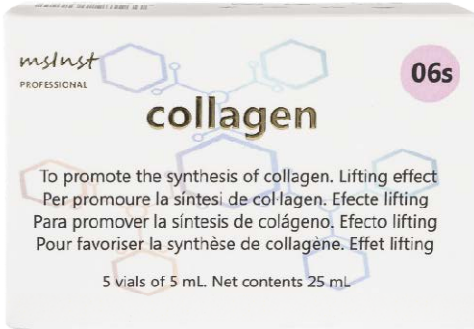

BENEFITS

- Activates lipolysis
- Decreases fat cell thickness
- Reduces cellulites appearance
- Prevents adipocytes growth
- Activates microcirculation
- Reshapes silhouette

MESOCOCKTAIL	SILHOUETTENN ^{/15} 5x10 ML	Ref: 102988s
	ACTION silhouetteNN ^{/15} is a lipolytic solution designed to slim the body. Actively remodelates and defines body shape. Special mixture of vitamins, plant extracts as well as mineral elements that reinforces microcirculation basic when lipolysis is activated.	INGREDIENTS L-Carnitine Cynara scolimuis extract, Tocopheryl acetate, Organic silica, Caffeine, Methylsilanol mannuronate BENEFITS <ul style="list-style-type: none"> ○ Activates lipolysis ○ Decreases fat cell thickness ○ Prevents adipocytes growth ○ Reshapes silhouette ○ Reduces double chin

ANTI-AGING

MESOCOCKTAIL	ANT-AGE ^{/05} 5x5 ML	Ref: 102872s
	ACTION anti-age ^{/05} is a complete bio-revitalizing formula designed to correct in depth the first stage of deep wrinkles. An ameliorated formula of bio-revitalizing components in a synergistic proportion is the key of the results from the first session. Restores moisture loss and at the same time stimulates collagen I synthesis and skin metabolism to restore its young and healthy appearance.	INGREDIENTS Tocopherol, Urea, Dexpanthenol, Retinyl palmitate, Thiamine. BENEFITS <ul style="list-style-type: none"> • Corrects deep wrinkles • Stimulates collagen synthesis • Stimulates dermal and epidermal cells • Skin cell detox • Slows aging process • Moisturizes • Unifies tone and brightness • Improves skin softness • Improves elasticity

MESOCOCKTAIL	COLLAGEN ^{/06} 5x5 ML	Ref: 102841s
	ACTION collagen ^{/06} is a solution designed to reduce the signs of skin sagging by stimulating the epidermis renew. The formula components, allows us to provide the basics elements to the fibroblasts to increase their collagen formation and anti-oxidant activity. It restores its young and healthy appearance. Ideal for skins with lost firmness and elasticity.	INGREDIENTS Tocopherol, Urea, Dexpanthenol, Retinyl palmitate, Thiamine. BENEFITS <ul style="list-style-type: none"> • Corrects deep wrinkles • Stimulates collagen synthesis • Stimulates dermal and epidermal cells • Skin cell detox • Slows aging process • Moisturizes • Unifies tone and brightness • Improves skin softness

FACIAL

MESOCOCKTAIL

VISAGE^{/03} 5x5 ML

Ref: 102803s

ACTION

visage^{/03} is an anti-aging solution designed to correct in depth the first signs of skin aging to restore its young and healthy appearance. The special apport of peptides as well as amino acids and oligoelements form caviar origin obtained from a private procedure, increases visible results from the first session.

INGREDIENTS

Piscum ovum extract, Tocopheryl acetate, Dexpanthenol, Urea, Glutathione.

BENEFITS

- Reduces wrinkles
- Skin cell detox
- Stimulates dermal and epidermal cells
- Slows aging process
- Improves elasticity
- Unifies tone and brightness
- Bio-revitalizes the skin

MESOCOCKTAIL

LIFT & YOUNG FACE^{/03} 5x5 ML

Ref: 160527s

ACTION

young & lift face^{/45} is a cocktail that the main action is to recover and reinforce the matrix.

On the skin, silicon has an important role for optimal collagen synthesis and activation of enzymes, improving skin strength and elasticity, and at the same time and acting synergistically there is a moisturizing effect due to hyaluronic acid and a lifting effect of DMAE together with the antioxidant activity of the vitamins A and E.

INGREDIENTS

Methylsilanol mannuronate, Tocopheryl acetate, Hyaluronic acid, DMAE, Retinyl palmitate.

BENEFITS

- Fine lines & Wrinkles
- Neck and décolleté skin rejuvenation
- Prevents skin aging
- Neutralizes free radicals
- Stimulates collagen synthesis
- Improves skin softness

HAIR

MESOCOCKTAIL

LIFT & YOUNG FACE^{/03} 5x5 ML

Ref: 160527s

ACTION

hair solution^{/04} is a solution designed to reinforce hair bulbs and stimulate hair growth to prevent hair loss. It has a mixture of potent anti-oxidants that optimizes metabolic performance of the catabolic and anabolic pathways and protein synthesis.

It seeks a longer duration of anagen phase (growth), having at the end stimulation of blood circulation and as result the hair follicle grow and survive.

INGREDIENTS

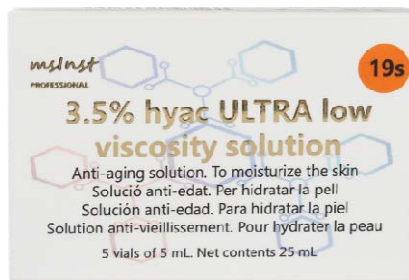

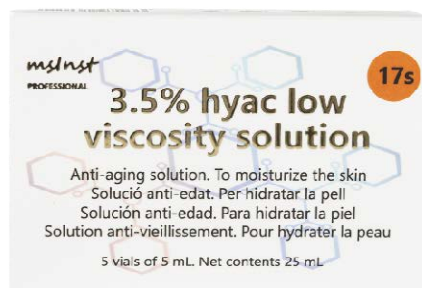

Piscum ovum extract, Dexpanthenol, Pyridoxine, Biotin, Tocopheryl acetate, Cysteine, Methionine, Thiamine, Glutathione

BENEFITS

- Stimulates cell metabolism
- Longer duration of anagen phase
- Slows follicle aging process
- Prevents hair loss
- Improves microcirculation of scalp
- Helps accelerate hair growth

MOISTURIZERS

MESOCOCKTAIL	3.5% HY-AC LOW VISCOSITY SOLUTION ^{/17} 5x5 ML	Ref: 102056s
MESOCOCKTAIL	3.5% HY-AC ULTRA LOW VISCOSITY SOLUTION ^{/19} 5x5 ML	Ref: 102070s
MESOCOCKTAIL	2% HY-AC LOW VISCOSITY SOLUTION ^{/28} 5x5 ML	Ref: 102087s

ACTION

Our hyac products are non cross linked hyaluronic acid of low molecular weight that acts as anti-aging treatment improving the texture of the skin, the fine wrinkles and scars in the face and neck area when is distributed into the mesoderm. It's very low viscosity allows a better distribution through the dermal layer improving the texture and hydration of the skin avoiding water loss as well as facilitating the delivery of other substances to the skin.

At the same time stimulates collagen I synthesis. The skin is therefore progressively tightened and moisturized. The skin is younger, nicer, both flexible and firm.

INGREDIENTS

Hyaluronic acid (combination of HA of different molecular weights).

- Hyaluronic acid low m.w. 200/50 Kd
- Hyaluronic acid 10/50 Kd

BENEFITS

- Reduces wrinkles and fine lines
- Stimulates collagen synthesis
- Firms the skin
- Moisturizes
- Improves skin softness

ANTI-BROWN SPOTS

MESOCOCKTAIL	LIGHTEN SKIN ^{/18} 5x5 ML	Ref: 102919s
--------------	------------------------------------	--------------

ACTION

lighten skin^{/10} is a solution designed to limit the extend of hyper-pigmentation or darkening of skin that is present in pregnancy (melasma). Also fights against skin discoloration caused by photo aging process (brown spots) and sun.

To the mixture of different melanin blockers at different levels, in a dose that affords maximum effect at lower doses without receptor saturation, the elements helps cell metabolism to restore the skin.

INGREDIENTS

Ascorbic acid, Arbutin, Kojic acid, Tocopheryl acetate, Urea, Azelaic acid

BENEFITS

- Inhibits pigmentation process
- Reduces skin discoloration
- Decreases melanin synthesis
- Has a visible lightening skin effect
- Diminishes hyper chromatic spots
- Reduces free radicals
- Hydrates and revitalizes the skin

ANTI-OXIDANTS / DETOX

MESOCOCKTAIL

DETOX SOLUTION^{/07} 5x5 ML

Ref: 102889s

ACTION

detox solution^{/07} is a complete anti-oxidant and anti-radical formula to restore cell metabolism. It stimulates natural defense of the skin.

To the anti-oxidation activity of the different components of the formula, the substances help to restore the cell metabolism and the skin immunology.

INGREDIENTS

Ascorbic acid, Tocopheryl acetate, Taurine.

BENEFITS

- Bio-revitalizes the skin
- Slows aging process
- Improves elasticity
- Reduces wrinkles
- Slows aging process
- Stimulates dermal and epidermal cells
- Skin cell detox

MESOCOCKTAIL

ANTI-OX SOLUTION^{/08} 5x5 ML

Ref: 102865s

ACTION

Oxidative stress happens when the amount of free radicals exceeds the amount of anti-oxidants

anti-OX solution^{/08} is an anti-aging solution designed to correct the oxidative stress and prevent premature skin aging.

The equilibrated components in the formula have the strongest anti-oxidative power, increasing the prevention of the premature skin aging.

INGREDIENTS

Ascorbic acid, Nicotinamide, Pyridoxine, Dexpanthenol, Retinyl palmitate, Thiamine

BENEFITS

- Anti-oxidant treatment
- Skin cell detox
- Bio-revitalizes the skin
- Slows aging process
- Improves elasticity
- Reduces wrinkles
- Unifies tone and brightness
- Slows aging process

MESOCOCKTAIL

ANTI-ROS SOLUTION^{/09} 5x5 ML

Ref: 102858s

ACTION

Reactive Oxygen Species (ROS) are free radicals that have the capacity to produce oxidative damage generated by UV rays and pollution.

anti-ROS solution^{/09} is an anti-radical formula to slow cellular aging due to oxidative stress by reducing cell-surface oxidase in skin, as a result skin appearance was improved through decreased protein cross-linking and an accelerated increase in collagen. Also prevents hyper-pigmentation intrinsic or photo-induced.

INGREDIENTS

Glutathione, Ascorbic acid, Tocopheryl acetate

BENEFITS

- Anti-oxidant treatment
- Anti free radicals
- Skin cell detox
- Stimulates dermal and epidermal cells
- Slows aging process
- Improves elasticity
- Improves appearance of small hyper-pigmentation
- Unifies tone and brightness

POLY-VITAMINS

MESOCOCKTAIL

VIT F10 COCKTAIL/¹⁸ 5x5 ML

Ref: 102063s

ACTION

vit F-10 cocktail/¹⁸ is made of vitamins A, B, C and E is the ultimate treatment against skin aging, free radicals, pigmentation and for skin lightening.

The combination of vitamin A, vitamin C, and vitamin E works synergistically to provide a powerful defense system against aging.

The B vitamins play important roles in cell metabolism and they are critical for energy production in the cells.

Free radicals can then be scavenged, collagen synthesis restored and melanin production reduced significantly

INGREDIENTS

Retinyl palmitate, Thiamine, Nicotinamide, Panthenol, Ascorbic acid, Pyridoxine, Tocopheryl acetate.

BENEFITS

- Prevents skin aging
- Reduces oily skin and acne
- Reduces alpha tyrosinase activity (pigmentation)
- Stimulates skin renewal
- Neutralizes free radicals
- Stimulates collagen synthesis

SPECIFIC USES

MESOCOCKTAIL

ANTI-RIDES/¹¹ 5x5 ML

Ref: 102063s

ACTION

anti-rides/¹¹ is a cocktail of active substances designed to reduce the signs of skin wrinkles by stimulating the dermis renew.

Ideal for skins with evident wrinkles and lost firmness and elasticity. It restores its young and healthy appearance. The low molecular weight hyaluronic acid fill the wrinkles and the amino acids bio-actives from caviar extract as well as elastin and the rest of the actives, allows us to provide the basics elements to the fibroblasts to increase their collagen production.

INGREDIENTS

Hyaluronic acid of low m. w., Ascorbic acid, Piscum ovum extract, Elastin, Urea, Panthenol, Pyridoxine, Thiamine.

BENEFITS

- Bio-revitalizes the skin
- Reduces wrinkles
- Stimulates dermal and epidermal cells
- Slows aging process
- Improves elasticity and firmness
- Anti-oxidant activity
- Reduces free radicals
- Skin cell detox

THE SKIN IS THE SCREEN OF YOUR LIFE STYLE

MESOCOCKTAIL

ANTI-CERNES/¹² 5x5 ML

Ref: 102193s

ACTION

anti-cernes/¹² is a formula designed to reduce the dark circles under the eyes by stimulating the microcirculation, increasing the apport of oxygen and lightening the area by interfering the melanin production. Also the amino acids from the caviar extract helps the epidermis renew.

The anti-oxidant activity of the components as well as the presence of substances that blocks the melanin production together with the hyaluronic acid and the elastin provides the basics elements to lighten the circles and stimulate the fibroblasts to increase their collagen formation and anti-oxidant activity

INGREDIENTS

Ascorbic acid, Tocopheryl acetate, Piscum ovum extract, Kojic acid, Azelaic acid, Hyaluronic acid, Caffeine, Urea, Elastin, Glycerin.

BENEFITS

- Reduces dark color under the eyes
- Skin cell detox
- Stimulates dermal and epidermal cells
- Increases microcirculation
- Reduces free radicals

MESOCOCKTAIL

LOVELY LIPS/⁶² 5x5 ML

Ref: 160183s

ACTION

lovely lips/⁶² is a cocktail that contains as skin conditioning actives like elastin, hyaluronic acid, caviar extract, and DMAE, together with antioxidants as ascorbic acid, tocopheryl acetate and ginkgo biloba, and caffeine as skin conditioner and micro circulation stimulator

The absorption of elastin and hyaluronic acid into the body of the lip increases hydration and their natural volume that can be seen after the firsts treatments.

The lips are therefore progressively tightened and moisturized due to the self production of the collagen I and hyaluronic acid.

The lips are younger, nicer, flexible and firm.

INGREDIENTS

Elastin, Caffeine, Ascorbic acid, Ginkgo biloba extract, Sodium hyaluronate, Tocopheryl acetate, Piscum ovum extract, DMAE

BENEFITS

- Subtle volume increase to the body of the lip
- Increased hydration
- Helps to prevent and cure cracked lips
- Reduction of fine lines and wrinkles
- Helps to eliminate 'smokers lines' that can cause the bleeding of lipstick
- Increase microcirculation

SINGLE COMPONENTS

MESOCOCTAIL	DMAE SOLUTION/ ³⁵ 5x5 ML	Ref: 160077s
	<p>ACTION</p> <p>DMAE is an analog of the B vitamin choline and is a precursor of acetylcholine. Although the role of acetylcholine as a neurotransmitter is well known, growing evidence points to acetylcholine as a ubiquitous cytokine-like molecule that regulates basic cellular processes such as proliferation, differentiation, locomotion, and secretion in a paracrine and autocrine fashion. Indeed, this modulatory role may contribute to the cutaneous activity (skin lift) of DMAE</p>	<p>INGREDIENTS</p> <p>DMAE</p> <p>BENEFITS</p> <ul style="list-style-type: none"> • Reduces coarse wrinkles under the eyes • Skin lifting • Anti sagging effect • Reduces naso-labial folds • Stimulates dermal and epidermal cells
MESOCOCTAIL	VITAMIN C/ ³² 5x5 ML	Ref: 102384s
	<p>ACTION</p> <p>The formula has a high concentration of vitamin C (up to 20%) to fight against skin aging, free radicals, pigmentation and for skin lightening.</p>	<p>INGREDIENTS</p> <p>Ascorbic acid.</p> <p>BENEFITS</p> <ul style="list-style-type: none"> • Reduces oily skin and acne • Reduces alpha tyrosinase activity (pigmentation) • Stimulates skin renewal • Neutralizes free radicals
MESOCOCTAIL	VITAMIN B5/ ³³ 5x5 ML	Ref: 102391s
	<p>ACTION</p> <p>vitamin B5/³³ is especially beneficial for the treatment of oily skin and acne but it is also very profitable to improve the hair condition.</p> <p>It has different activities and properties:</p> <ul style="list-style-type: none"> - acts as a moisturizer, reducing transepidermic water loss, - helps to manage the negative results that oxidative stress has on the skin, such as redness, fine lines and skin roughness and - activates the fibroblast proliferation and accelerates re-epithelization in wound healing. 	<p>INGREDIENTS</p> <p>Dexpanthenol.</p> <p>BENEFITS</p> <ul style="list-style-type: none"> • Reduces stretch marks • To fight hair loss • Anti-aging effect • Reduces acne • Against oily skin • Reduces scars

MESOCOCKTAIL

VITAMIN B7/³⁴ 5x5 mL

Ref: 102407s

ACTION

vitamin B7/³⁴ influences the composition of keratin and promotes the formation of intercellular lipid layers through increased lipid synthesis, which improves the skin's natural barrier function and provides a distinct reduction of fine wrinkles in the skin (the correct and efficient fat production processes are critical for the health of all cells).

vitamin B7/³⁴ can be used to alleviate the symptoms of seborrheic dermatitis, eczema and dry skin, as well as combating hair loss and graying.

Biotin is so effective against hair loss and helps increase the health of the hair. It is the vitamin that keeps the hair healthy, strong and glossy.

INGREDIENTS

Biotin.

BENEFITS

- Reduces stretch marks
- To fight hair loss
- Activates hair growth
- To fight acne
- Helps skin rejuvenation
- Anti-aging effect

“REAL RESULTS
RADIANT SKIN”

THE SKIN IS THE SCREEN
OF YOUR LIFE STYLE

BIOMIMICRY MESOTHERAPY BY TELUP

BIOMIMICRY BY TELUP

HAIR BIOMIMICRY

Ref: 102315

ACTION

HAIR Biomimicry mesotherapy® contains a mixture of peptides with specific activity on hair follicles, activating their stem cells, promoting hair growth and helping blood microcirculation, revitalizing the scalp area.

Also the presence of different amino-acids as well as mineral salts supports the appearance of healthy performance hair follicles, and the presence of vitamin B complex boost of energy to the cells, as well as antioxidant substances, that counter damage the free radicals in the scalp and the piscum ovum extract (caviar) with their peptides, amino-acids, lipids and vitamins, that contributes to revitalize the cells, inducing a longer duration of the anagen phase, hair recovery and healthy growth effect

INGREDIENTS

Lyophilized vial: Mannitol, Octapeptide-2, Acetyl tetrapeptide-3, n-acetyl carnosine, Copper Tripeptide, Acetyl Decapeptide-3.

Specific solvent: Panthenol, Biotin, Thiamine chloride, Piscum ovum extract (caviar), Zinc, Arginine chloride, Methionine, Cysteine

BENEFITS

- Promotes hair growth
- Stem cells of hair follicle activation
- Increases microcirculation
- Renew skin cells and hair
- Increase in size of hair follicle
- Better hair vitality

biom

POLYCOMPONENT SOLUTION

HYAC-AA-BOOSTER

Ref: 160794

ACTION

Inspired by the Botox treatment, RIDES Biomimicry mesotherapy® combines ingredients to achieve a non-toxic Botox effect.

It will reduce and prevent emotional lines by inhibiting muscle contractions (via the mimic peptide which is a fragment of SNAP-25, a substrate of botulinum toxin and the syn-AKE competitor of acetyl choline receptors) and at the same time, it will induce synthesis of collagen and other skin molecules (through the mimics of matrikines that regulate the sequence of events required for skin repair and wound healing).

On the other hand, another group of peptides decrease progerin synthesis, increase proteoglycan production and contract collagens, in an antioxidant ambience and with the help of vitamin B complex that boosts of energy and piscum ovum extract (caviar) that apport basic peptides, amino-acids and vitamins to enhance cell recovery

INGREDIENTS

Lyophilized vial: Mannitol, Copper Tripeptide, Trifluoroacetyl-tripeptide-2, n-acetyl carnosine, Acetyl hexapeptide 3, Palmitoyl pentapeptide-4, syn-AKE.

Specific solvent: Niacinamide, Piscum ovum extract (caviar), Urea, Panthenol, DMAE, Hyaluronic acid.

BENEFITS

- Reduction of expression lines
- Lifted and firming appearance reducing slackness and sagging
- Younger looking facial contour
- Increased synthesis of collagen and other skin molecules
- Healthy moisture balance

biom

BIO-REVITALIZATION

MESOHYAC-16

Ref: 160497

ACTION

Bio-revitalization with hyaluronic acid is a modern technique designed to eliminate age-related changes in the skin, to achieve its moisturizing and rejuvenation and to hide the impact of unfavourable environment.

Bio-revitalization is the revitalization of skin with hyaluronic acid active substance, in a biological way designed to eliminate age-related changes returning the life to skin.

The results of this procedure are: the skin is moisturized; its structure is restored, at the same time the formation of collagen and elastin is activated, all that provides to the skin firmness and correct shape of the face.

INGREDIENTS

Aqua, Sodium hyaluronate different m.w, Sodium chloride, Disodium phosphate, Sodium phosphate.

BENEFITS

- Young skin – ageing prophylaxis
- Decrease of skin elasticity
- Dry and dehydrated skin
- Stressful skin due to free radicals
- Small and mimics wrinkles
- Greyish, tired, smoker's skin
- After aggressive skin procedures

POLYCOMPONENT SOLUTION

HYAC-AA-BOOSTER

Ref: 160794

ACTION

The development of Hyac-aa-boosteR has focused on the identification of biomolecules that can help fibroblast function and improve extracellular matrix component biosynthesis.

Based on this approach, our solution contains :

- A total of 19 amino acids, represent the relevant substrates required to build dermal extracellular matrix proteins, mainly collagens, elastine and hyaluronic acid.
- Antioxidants, helping to detoxify the skin cells.

3.5% of Hyaluronic acid of different molecular weights allowing this mixture moisturize the skin and providing long lasting effects

INGREDIENTS

Water, Glycine, Sodium hyaluronate, Proline Alanine, Valine, Sorbitol, Glutamic acid, Glutathione, Leucine, Arginine, Aspartic acid, Serine, Lysine, Taurine, Sodium hydroxide, Phenylalanine, Isoleucine, Threonine, Methionine, Histidine, Tryptophan, Tyrosine, Cysteine.

BENEFITS

- Restore dull, stressed skin
- Encourages faster cell renewal
- Boosts a youthful radiance
- Minimize the appearance of fine lines, wrinkles, and enlarged pores.
- Provide additional anti-aging effect
- Photo-protective effect and fight against photo-aging
- Moisturize the skin

POLYCOMPONENT SOLUTION

HYAC-AA-BOOSTER-PLUS

Ref: 160794sy

ACTION

The development of Hyac-aa-boosteR has focused on the identification of biomolecules that can help fibroblast function and improve extracellular matrix component biosynthesis.

Based on this approach, our solution contains :

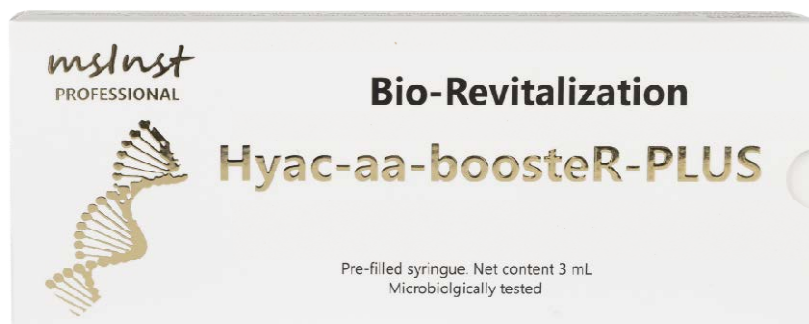

- A total of 19 amino acids, represent the relevant substrates required to build dermal extracellular matrix proteins, mainly collagens, elastine and hyaluronic acid.
 - Antioxidants, helping to detoxify the skin cells.
- 3.5% of Hyaluronic acid of different molecular weights allowing this mixture moisturize the skin and providing long lasting effects

INGREDIENTS

Water, Glycine, Sodium hyaluronate, ProlineAlanine, Valine, Sorbitol, Glutamic acid, Glutathione, Leucine, Arginine, Aspartic acid, Serine, Lysine, Taurine, Sodium hydroxide, Phenilalanine, Isoleucine, Threonine, Methionie, Histidine, Tryptophan, Tyrosine, Cysteine.

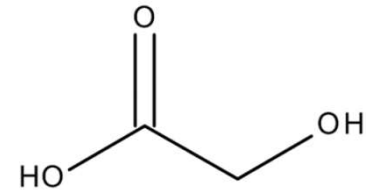

BENEFITS

- Restore dull, stressed skin.
- Encourages faster cell renewal.
- Boosts a youthful radiance.
- Minimize the appearance of fine lines, wrinkles, and enlarged pores.
- Provide additional moisture, significantly increasing the protective function of the Horny layer of the epidermis.
- Provide additional anti-aging effect.
- Photo-protective effect and fight against photo-aging.
- Moisturize the skin.

GLYCOLIC ACID /25-27

GREAT TRAN-SEPIDERMAL PENETRATION CAPACITY. ALL SKIN TYPES

Glycolic acid (GA) is the most common alpha-hydroxy acid peel. GA has the smallest molecular weight amongst all AHA. It penetrates skin easily, making it a popular peel agent.

It removes the outermost layer (stratum corneum) of skin cells interfering the enzymes responsible for adhesion of keratinocytes (keratolytic effect) and promoting the shedding of dead skin cells.

GA stimulates fibroblasts in the dermis to produce increased amounts of collagen. Also GA have anti-inflammatory and antioxidant effect.

The intensity of peel is determined by the concentration of the acid, the vehicle used to carry it, the amount of acid applied, and the technique used.

GA peels need to be properly neutralized to stop acidification of the skin.

MAIN INGREDIENTS

Glycolic acid, Dexpanthenol, Aloe barbarensis, Matricaria recutita, Retinyl palmitate

20% GLYCOLIC ACID PEEL

Ref: 102995

50 mL

pH +3.5

pKa 3.86

PEELING

Very superficial

CAN HELP INTO

- Light hormonal acne
- Improves fine lines
- Collagen stimulation

35% GLYCOLIC ACID PEEL

Ref: 102100

50 mL

pH +3.5

pKa 3.86

PEELING

Superficial

CAN HELP INTO

- Sun damage
- Hormonal acne
- Improves fine lines
- Collagen stimulation

50% GLYCOLIC ACID PEEL

Ref: 102117

50 mL

pH +3.5

pKa 3.86

PEELING

Superficial-Medium

CAN HELP INTO

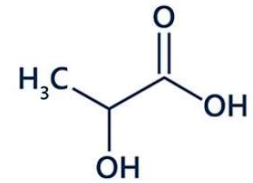

- Sun damage
- Hormonal acne
- Improves fine lines
- Collagen stimulation
- Superficial acne scars
- Dilated pores.

DO NOT USE IN SUMMER TIME

LACTIC ACID/30-31

HIGH SKIN TOLERANCE, MOISTURIZING EFFECT. SENSITIVE, DRY, THIN AND/OR DEVITALIZED SKIN

Lactic acid is absorbed across the stratum corneum and diminishes the cohesion of the surface skin cells by breaking desmosomal bonds between keratinocytes. and subsequently prevents the thickening of the stratum corneum, removing aging cells, debris and pollutants attached to the skin surface.

It is an antioxidant and chemical exfoliant.

They exfoliate the surface of the skin, while deep cleaning the pores. They stimulate natural collagen production, even out the skin tone and improve hyper pigmentation of the skin, and will fade dark spots. . It, smooth rough areas (soften fine lines).

Stimulates new healthy skin cells production and increases collagen and glycosaminoglycans formation. Increase hydration. Cleans clogged pores.

MAIN INGREDIENTS

Lactic acid, Glycyrrhiza glabra, Camellia sinensis, Kojic acid

30% LACTIC ACID PEEL

Ref: 102124

50 mL

pH +3.5

pKa 3.86

PEELING

Very superficial

CAN HELP INTO

- Improving skin texture
- Reducing the appearance of very superficial fine lines and wrinkles.
- Brighten irregular pigmentation.
- Improve dry skin

40% LACTIC ACID PEEL

Ref: 102131

50 mL

pH +3.5

pKa 3.86

PEELING

Superficial

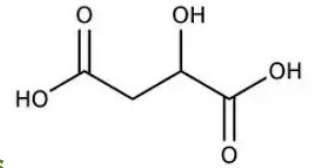

CAN HELP INTO

- Hyper pigmentation
- Age spots
- Improved skin tone and reduced pore appearance
- Improve dry skin
- Improve acne and dry up oily skin
- Reduces redness.

CAN BE USED IN SUMMER

MALIC ACID/47

HIGH SKIN TOLERANCE. SMOOTH WRINKLES AND FINE LINES, IMPROVE SKIN TEXTURE, CLEANSE PORES. PARTICULARLY SUITABLE FOR INDIVIDUALS WITH DRY OR MATURE SKIN

Malic acid stimulates the exfoliation of skin by interfering breaking down the cohesive bonds of dead epidermal cells (keratinocytes) and inhibiting the progression of the cell cycle in the G0 (non active)/G1 (cell division) phase.

MA moisturizes the stratum corneum by humectant action and promotes their exfoliation and also help in increasing the production of collagen, which results in a thinner, more flexible stratum corneum, improved skin smoothness and reduced wrinkles. It refines balances and regenerates the skin while minimizing lines and minor irregularities for a fresher and younger-looking complexion.

MA can open up the pores, allowing them to expel their sebum and reduce the acne. It can be used to treat photo damage, rosaceous, superficial pigmentation and eczema.

The skin may be a bit pink, thigh and dry following the peel.

MAIN INGREDIENTS

Malic acid (15%), Mandelic acid, Salicylic acid.

15% MALIC ACID PEEL

Ref: 160541

50 mL

pH +3.5

pKa 3.4

PEELING

Superficial

CAN HELP INTO

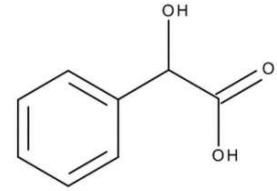

- Improving skin texture
- Reducing fine lines and wrinkles.
- Minimize irregular pigmentation.
- Improve dry skin (moisturize)
- Mild acne

CAN BE USED IN SUMMER

MANDELIC ACID/36-37

SOFT AND PROGRESSIVE PENETRATION. THICK, OILY, SEBORRHEIC AND/OR DYSCHROMIA SKIN

Mandelic acid has the higher molecular weight than any other AHA, and as a result its action is slower than the others avoiding skin burning. Hydrolyzing amide bonds between keratinocytes reducing corneocytes adhesion breaks the union between corneal cells removing aging cells, debris and pollutants attached to the skin surface, encouraging renewal and cell turnover.

Minimizes the appearance of the fine lines and wrinkles by stimulating collagen and elastin and proteoglycans contents in the dermis.

MA do not stop penetrating the skin until neutralized.

MAIN INGREDIENTS

Mandelic acid, Hamamelis virginiana, Matricaria recutita, Phytic acid

30% MANDELIC ACID PEEL

Ref: 102148

50 mL

pH +3.5

pKa 3.41

PEELING

Very superficial

CAN HELP INTO

- Oily skin or excess of sebum
- Small expression wrinkles
- Signs of photo aging
- Enlarged pores

40% MANDELIC ACID PEEL

Ref: 102155

50 mL

pH +3.5

pKa 3.41

PEELING

Superficial

CAN HELP INTO

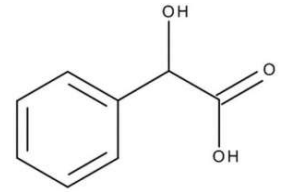

- Acne and rosacea (skin redness)
- Seborrheic dermatitis
- Oily skin or excess of sebum
- Small expression wrinkles
- Signs of photo aging
- Enlarged pores

CAN BE USED IN SUMMER

PYRUVIC ACID/52

QUICKLY AND PROGRESSIVE PENETRATION. INFLAMMATORY ACNE, MODERATE ACNE SCARS, GREASY SKIN

Pyruvic acid has a very low molecular weight and its action is characterized by the high lipophilicity of the ingredient, which makes it able to penetrate more deeply and quickly. Physiologically it is converted to Lactic acid.

It is keratolytic (desmosomal disruption) and has sebostatic and antimicrobial, properties as well as moisturizing and anti-aging effects. It reaches the innermost layers of the dermis. It is ideal for middle and deep wrinkles. It stimulates the formation of collagen, glycoprotein, and elastic fibers.

PA is an excellent option for brightening and exfoliating aging skin. In addition, this peel helps to decrease fine lines, wrinkles, acne and hyper-pigmentation (brown spots).

MAIN INGREDIENTS

Pyruvic acid (30%), Lactic acid, Camellia sinensis.

PYRUVIC ACID PEEL

Ref: 160572

50 mL

pH +3.5

pKa 2.39

PEELING

Superficial-Medium

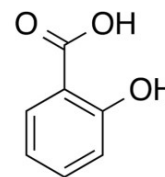

CAN HELP INTO

- Oily skin or excess of sebum
- Inflammatory acne
- Moderate acne scars
- Seborrheic dermatitis
- Anti-aging and photo aging
- Superficial hyper pigmentations

DO NOT USE IN SUMMER TIME

SALICYLIC ACID / 40-41

POWERFUL KERATOLYTIC AND SEBORREGULATORY. OILY, PRO-ACNEIC AND/OR SEBORRHEIC SKIN

Salicylic acid is a Beta Hydroxy Acid (BHA) is a lipid-soluble agent that exerts a powerful keratolytic effect, comedolytic, anti-inflammatory and antimicrobial

As a desmolytic agent has the ability to disrupt cellular junctions rather than breaking or lysing intercellular keratin filaments, removing the intercellular lipids, which are linked covalently to the cornified envelope surrounding the surface of the epithelial cell, and easily penetrates the pilosebaceous duct, regulating sebum secretion.

Highly effective as agent for the realization of a superficial peeling, removing aging cells, oil and debris attached to skin surface. and at low concentrations has an anti-inflammatory effect.

Salicylic peels help to detoxify stressed skin while unclogging pores.

MAIN INGREDIENTS

Salicylic acid, Hamamelis virginiana, Centaurea cyanus

15% SALICYLIC ACID PEEL

Ref: 102162

50 mL

pH +3.5

pKa 2.97

PEELING

Very superficial

CAN HELP INTO

- Acne vulgaris
- Oily skin
- controls sebum secretion.
- decreases the size of pores.
- unifies skin tone

25% SALICYLIC ACID PEEL

Ref: 102179

50 mL

pH +3.5

pKa 2.97

PEELING

Superficial

CAN HELP INTO

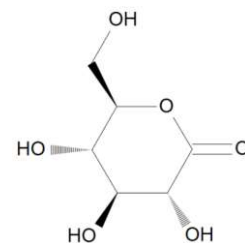

- Acne vulgaris
- Photo damage
- Freckles and lentigines
- Post inflammatory hyper pigmentation
- Oily skin
- dilated pores
- superficial acne scars
- moderate actinic keratosis
- seborrheic dermatitis

DO NOT USE IN SUMMER TIME

GLUCONOLACTONE /48

HIGH SKIN TOLERANCE. SMOOTH WRINKLES AND FINE LINES, IMPROVE HYDRATION. PARTICULARLY SUITABLE FOR INDIVIDUALS WITH DRY, HYPERSENSITIVE, MATURE OR ACNE PRONE SKIN

Gluconolactone has a larger molecule that can't penetrate very deeply into the skin. It is a gentle exfoliator that helps jumpstart cellular turnover dissolving the dead cells that leave the complexion rough and lackluster with regenerating, moisturizing and smoothing action on the skin.

It exhibits antioxidant and moisturizing effects. New research suggests that gluconolactone may also have antimicrobial properties. This means that it may be beneficial for congested or acne-prone skin types.

Gluconolactone is a natural antioxidant which is as effective as vitamin C and vitamin E.

Gluconolactone blocks the synthesis of pro-interleukin-1, which can cause increased inflammation also it has the ability to transfer water molecules playing a central role in skin moisturizing. As a chelating agent, gluconolactone allows to bind and remove free radicals from the body. The oxidation process, caused by overabundance of iron and UV-rays influence, occurs in skin pigmentation that is a typical sign of photo ageing. Gluconolactone helps to bind free iron ions preventing the oxidation process and consequences of UV-radiation.

Gluconolactone initiates processes that precede the production of hyaluronic acid in keratinocytes and fibroblasts, as well as the synthesis in matrix of metalloproteinase and collagen.

MAIN INGREDIENTS

Gluconolactone (25%), Glycolic acid, Lactic acid.

GLUCONOLACTONE PEEL

Ref: 160558

50 mL

pH +3.5

pKa 3.6

PEELING

Superficial

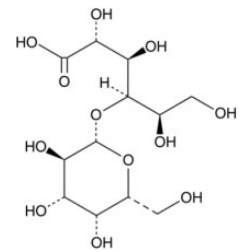

CAN HELP INTO

- Improving skin hydration.
- Increasing skin elasticity
- Offers antioxidant properties: neutralize free radicals to combat UV damage,
- Acne (comedones, blackheads, whiteheads)
- Wrinkles and fine lines
- Dark spots
- Mature skin
- Dull skin

CAN BE USED IN SUMMER

LACTOBIONIC ACID /49

HIGH SKIN TOLERANCE, PENETRATE THE SKIN GRADUALLY. SMOOTH WRINKLES AND FINE LINES, IMPROVE HYDRATION. PARTICULARLY SUITABLE FOR INDIVIDUALS WITH SENSITIVE, MATURE OR ACNE PRONE SKIN

Polyhydroxy acids penetrate the skin gradually, layer by layer. Due to this fact, their use in peel treatments does not cause strong burning sensation and irritation of skin.

Lactobionic acid possessing a polyhydroxy structure have multifunctional groups and thus acts as a metal ion chelator and can sequester calcium that suppresses matrix metalloproteinase enzymatic activity, helping to protect against further sun damage as well as antioxidant properties used to fight against the damaging oxygen molecules as well as free radicals to protect our skin from the environmental pollutants that we are all exposed to on a daily basis, as well as exfoliator removing the outermost layer of dead skin cells

LA is a mild exfoliant that smoothes and resurfaces without causing irritation or redness. Thanks to minimal irritative effect, it can be successfully performed even on sensitive skin that is prone to acne.

Lactobionic acid can function as a link between iron ions, providing strong antioxidant effect. It removes free radical intermediates and protects skin from dangerous UV radiation.

LA inhibits matrix metalloproteinase, which are the main cause of skin aging. They destroy the major components of the extracellular matrix of the skin, collagen in particular, causing elasticity loss, deep wrinkles and a sagging face.

MAIN INGREDIENTS

Lactobionic acid (25%), Glycolic acid, Glycyrrhiza glabra, Sodium hyaluronate

GLUCONOLACTONE PEEL

Ref: 160558
50 mL
pH +3.5
pKa 3.6

PEELING Superficial

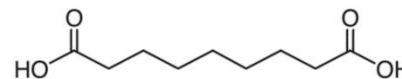

CAN HELP INTO

- Hyper-pigmentation.
- Stimulating exfoliation process.
- Lightening skin.
- Increasing skin hydration.
- Protects against sun damage
- Brightens skin
- Fades dark marks: aids in the lessening of scars and hyper pigmentation
- Thickens skin: increase epidermal thickness

CAN BE USED IN SUMMER

AZELAIC ACID/60

MILD EXFOLIATING PROPERTIES. BACTERIOSTATIC, SEBOSTATIC, ANTIOXIDANT. PARTICULARLY SUITABLE FOR INDIVIDUALS MATURE OR ACNE PRONE SKIN

Azelaic acid is a relatively mild acid peeling agent with mild exfoliating properties.

It is a multifunctional skincare ingredient that tackles a multitude of concerns related to breakouts and inflammation.

Through the usage of its keratolytic abilities, azelaic acid can break down the dead cells, dull outer layers of skin, removing dead skin cells as well as reducing the production of keratin by keratinocytes.

It has anti-inflammatory, bacteriostatic, sebostatic (reducing the concentration of oil in the skin), comedolytic, germicide, and fungicide properties (clearing the pores of bacteria). This is why azelaic acid is great for acne breakouts, post-acne scarring and melasma. It is highly effective against pimples and blemishes in acne-prone skin.

It decreases pigmentation, inhibiting the enzyme tyrosinase that leads to hyper pigmentation.

MAIN INGREDIENTS

Azelaic acid (20%), Glycyrrhiza glabra, Lactic acid, Salicylic acid.

AZELAIC ACID PEEL

Ref: 160510

50 mL

pH +3.5

pKa 4.5

PEELING

Superficial

CAN HELP INTO

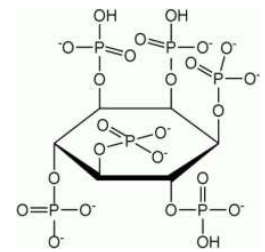

- Fighting rosacea
- In hyper pigmentation,
- Against whiteheads, blackheads
- In acne scars
- For skin lightening
- Decreases skin oil concentration

CAN BE USED IN SUMMER

PHYTIC ACID / 51-51A

MILD EXFOLIATING PROPERTIES. POOR PENETRATION. ANTIOXIDANT. PARTICULARLY SUITABLE FOR HYPERPIGMENTATION AND YOUNG PEOPLE WITH ACNE.

Phytic acid has progressive and sequential therapeutic action, in a non-aggressive manner.

The molecules of phytic acid are relatively large in size; during skin treatment, they do not penetrate deeply into skin, but stay in the horny layer. At the same time, they are capable of retaining hydrogen ions and keeping them from penetrating into skin.

It is antioxidant, whitening and it has anti-inflammatory properties, helping to remove the existing pigment spots (inactivating tyrosinase) and prevents the development of new ones. It has been proven to be a great way to solve problems of mature skin with cuperosis. It has a lifting effect.

Suppress cell division and increase apoptosis (programmed cell death).

When skin it is exposed more than 15 minutes, keratinocytes start dying, being that period the maximal possible time of exposure

Because phytic acid functions more as an antioxidant than a true exfoliating agent, it is less irritating to the skin. It makes mild and non-aggressive treatment while whitens the skin, stimulating skin regeneration cells and also it can help to neutralize free radical damage in the skin.

Also as a chelator, phytic acid appears to work mechanistically blocking the entrance of iron and copper in the formation of melanin, thus stopping the synthesis of melanin and also absorbing iron molecules in the skin, which are responsible for causing damage to DNA.

This peel is especially popular for the treatment of acne in teenagers

MAIN INGREDIENTS

Phytic PREP- Mandelic acid, Matricaria recutita,

Phytic acid peel- Phytic acid (20%), Lactic acid, Glycolic acid, mandelic acid, Camellia sinensis

PHYTIC ACID PREP

Ref: 160688

50 mL

PEELING NO. Only skin preparation for the peel

pKa 1.5

PEELING

Superficial

CAN HELP INTO

- Fighting rosacea
- In hyper pigmentation,
- Against whiteheads, blackheads
- In acne scars
- For skin lightening
- Decreases skin oil concentration

CAN BE USED IN SUMMER

PR360 COCKTAIL PEEL^{/44}

NON WHITE FROSTING PEELING. REJUVENATION, ANTIOXIDANT, HYPERPIGMENTATION. PARTICULARLY SUITABLE FOR MATURE SKIN

PR360^{/44} is a peeling cocktail gel capable of stimulating and reshaping the deep dermis.

Its formulation allows to penetrate the skin gradually, layer by layer. Due to this fact, their use in peel treatments does not cause burning sensation or irritation of skin.

It penetrates the stratum corneum, epidermis and dermis, stimulates the activity and cell renewal of fibroblasts inducing the production of collagen, and the activation of the skin and growth factors such as PDGF- β , TGF- β 1, TGF- α , VEGF as well as inhibits the production of melanin and increases the muscle toning and turgidity.

PR360 does not cause "white frosting". It can be used to remove stretch marks, scars caused by chickenpox, acne and melasma. The result is immediately appreciated because the skin immediately appears more turgid and smooth.

Their action is based on the equilibrated mixture of TCA, Kojic Acid, DMAE, the dismutation capacity of hydrogen peroxide (redox reaction in which H_2O_2 is converted in two different compounds, one of higher and one of lower power oxidation states) and the resurfacing effect of phytic acid.

Also it has antioxidant action and protects against free radical attacks.

MAIN INGREDIENTS

TCA, Peroxide hydrogen, Kojic acid, Glycerin, DMAE, Phytic acid

PR360

Ref: 160169

5 mL

pH +3.5

PEELING

Superficial-Medium

CAN HELP INTO

- General Skin Irregularities,
- skin aging
- premature aging
- reduced skin elasticity

CAN BE USED IN SUMMER

V WHITENING INTIMATE GEL PEEL /53

INTIMATE AREA, ARMPITS, GROIN. REJUVENATION, ANTIOXIDANT, HYPER-PIGMENTATION. PARTICULARLY SUITABLE FOR MATURE PIGMENTED SKIN

Darkening or discoloration of the skin in the intimate area, as well as the groin and underarms is a common concern. Intimate gel peel has been designed to help to improve pigmentation, rejuvenate and brighten the skin on the delicate regions. This bleaching treatment helps to improve hyper-pigmentation around the vagina or groin area as well as around the anus. It uses a topical solution, containing safe ingredients formulated to lighten unsightly blemishes and darkening of common delicate areas on the body.

As well as improving pigmentation, also works to rejuvenate and brighten the skin as skin peeling does. It can be used from the pubic area around to the anal area on women and from the groin to the anal area on men. Also it can be used on underarms area, knees, elbows or any part of the body. External use only (do not use in mucous or any internal genital part)

MAIN INGREDIENTS

Glycolic acid, Vitamin C, Aloe barbarensis, Urea, Glycyrrhiza glabra, Lactic acid, Kojic acid

V WHITENING INTIMATE GEL PEEL

Ref: 160640

10x4 mL

pH +3.5

PEELING

Very superficial-Superficial

CAN HELP INTO

- Hyper-pigmentation.
- Rejuvenate and brighten the skin on the delicate body areas.
- Exfoliates dead cells.
- Also it can be used on underarms area, knees, elbows or any part of the body

BEFORE & AFTER PEEL CARE

PRE-PEEL CLEANSER

Prepares the skin for the exfoliating treatment.

Thanks to its citric acid and lactic acid, it effectively cleanses the skin from the superficial keratinized layers of the epidermis, unblocks the sebaceous glands and reduces the lipid barrier. This pre-peel cleanser due to its formulation uniformes the pH of the skin at the same time that reduces the lipid barrier and cleanses the keratinized layers from pollution and dust. This allows an even penetration and increases the effectiveness of any type of exfoliating acid.

DISPENSER 250 ML

Ref: 102957

PRE-PRIMING PEEL

Specially designed for skin type IV to VI.

Prepares thick and dark skin for the exfoliating treatment.

Thanks to its glycolic acid and azelaic it effectively cleanses the skin from the superficial keratinized layers of the epidermis, unblocks the sebaceous glands and reduces the lipid barrier, to reduce the risk of complications after peeling like over hyper pigmentation.

This pre-priming peel has been specifically designed for those persons that have thicker skin and skin types IV to VI.

POST PEEL NEUTRALIZING SOLUTION

The ingredients of post-peel neutralizing solution are designed to calm and sooth the skin after a peel and block the acid activity. Panthenol, propylene glycol and glycerin has long been used as therapy for sunburns. They reduce inflammation and calms irritated skin. And Sodium bicarbonate stops the acid activity in the skin.

The post-peel neutralizing solution^{/23} is far more effective than just rinsing off the peel with water. It stops the peel from going too far into the skin. It calms inflamed skin and helps to return the skin to its normal pH Level. Tap water alone could not accomplish this as the pH of water is not high enough to equalize the chemical reaction of the acid.

SPAY 100 ML

Ref: 102940

POST PEEL MOSTURIZING HYALURONIC SERUM

Serum enriched with anti-oxidants, low-molecular-weight hyaluronic acid and a blend of ingredients with the ability to increase cellular moisture by stimulating aquaporin formation and our caviar extract.

This exclusive synergy provides the highest levels of skin moisture, and collagen stimulation.

The post-peel moisturizing hyaluronic serum is the latest generation of moisturizing skin care, not acting only over the superficial epidermis, but at the level of the skin cells and the dermis to treat efficiently the skin dryness. It helps to preserve the essential water of the skin cells by stimulating the aquaporin-3 formation, restores the cellular junctions to avoid transepidermic water loss and stimulates the collagen I synthesis to improve the skin elasticity.

SPAY 100 ML

Ref: 102933

ÉMULSION NUTRIPEEL

Our ÉMULSION NUTRIPEEL are infused with our exclusive caviar extract, that apportos an anti-aging benefits, as well as is enriched with anti-oxydants, low-molecular-weight hyaluronic acid and a blend of ingredients with the ability to increase cellular moisture. This exclusive synergy provides the highest levels of skin moisture, and collagen stimulation and treats efficiently the skin dryness.

It helps to preserve the essential water of the skin cells, restores the cellular junctions to avoid transepidermic water loss and stimulates the collagen I synthesis to improve the skin elasticity.

It offers the highest skin comfort and tolerance.

BENEFITS

- Replenishes skin and provides a balanced nutrition & moisture
- Preserves the highest skin and cellular moisture.
- Restores the skin cohesion and to avoid transepidermic water loss
- Tightens and firms the skin
- Calm the skin

COSMETIC JAR 50 ML

SERUMS

HYALURONIC SERUM^{/S01}

INGREDIENTS

Water, Hydrolized hyaluronic acid, 1,2 propanediol, Glycerin, Aloe barbadensis, Polyethylene glycol, Phenoxyethanol, Fragrance, PEG 35 castor oil, Sodium hyaluronate, Gluconolactone, Camellia sinensis, Sodium benzoate, Tocopheryl acetate, Caprylyl glycol, Sodium EDTA, Xanthan gum, Pullulan, Sodium hydroxide

DESCRIPTION

The HYALURONIC SERUM^{/S01} formula is our contribution to moisturizing treatments for the skin, which act not only on the superficial epidermis, but also at the level of the skin cells and the dermis to effectively treat dry skin. Contains a specialized matrix of skin-smoothing hyaluronic acid and penetrating aloe barbadensis and gluconolactone to lock in moisture, keeping skin hydrated. Helps conserve essential water and restores cell junctions to prevent transepidermal water loss and facilitate collagen I synthesis to improve skin elasticity. Keeps skin hydrated throughout the day and helps to firm and tighten sagging skin and provides definition and fullness. It also fights free radicals responsible for premature aging. Improves skin elasticity and minimizes the appearance of expression lines and wrinkles, including fine lines around the eyes

FLASK 30 mL Ref: 160718

EQUILIBRANTE SERUM^{/S02}

INGREDIENTS

Water, Propylene glycol, Ethanol, Isopropyl alcohol, Azelaic acid, Salicylic acid, Sodium ascorbyl phosphate, Rosemary officinalis, Phytic acid, Camellia sinensis, Zinc gluconate, Mandelic acid, Sodium EDTA, Citric acid, Sodium benzoate, Potassium sorbate, Xanthan gum, Quaternium 73, Sodium hydroxide.

DESCRIPTION

During adolescence, sebaceous glands enlarge and produce more sebum under the influence of androgens of gonadal or adrenal origin, and as a result accompanies the plugging of the pores with naturally occurring dead skin cells blocking hair follicles.

Our EQUILIBRANTE SERUM^{/S02} has among BHA (Salicylic acid) and AHA acids (Glycolic acid, Phytic acid and Azelaic acid), a set of vegetal and nature actives that act synergistically, with rapid absorption to control the oily skin production as well as the acne control and improves the appearance of pores.

The presence of salicylic acid in the serum not only acidifies the skin pH and inhibit the proliferation of acne bacteria, but also supports the barrier function against dehydration and irritation.

FLASK 30 mL Ref: 160763

INTIME SERUM^{/S03}

INGREDIENTS

Water, Elastin, Sodium ascorbyl phosphate, Collagen, Calendula officinalis, Sodium hyaluronate, Gluconolactone, Kojic acid, Glycerin, Arbutin, DMAE tartrate, Ginkgo biloba, Phenoxyethanol, Panthenol, Sodium EDTA, PEG 35 castor oil, Potassium sorbate, Sodium benzoate, Xanthan gum, Pullulan, Fragrance, Sodium hydroxide

DESCRIPTION

Our INTIME SERUM^{/S03} formula is part of our innovative concept of cosmetics designed to care for one of the most abused parts of our skin: the external genital area.

It is composed by a set of actives substances and solubilized oily extracts that moisturizes and nourish the external skin of the genital zone and as a result it recovers the firmness and elasticity looking visibly younger skin.

Formulated specifically to combat bad moisturizing and nutrition of the external part of the genital area, which causes a loss of elasticity and firmness, Gluconolactone, Elastin and Collagen, together with vegetable actives extracts and vitamin C stimulates the formation of collagen while maintaining the firmness of the skin.

At the same time the depigmenting compounds acting in a synergistic way contribute to a clearance of the external genital area

FLASK 30 ML Ref: 160749

ANTI-POLLUTION SERUM^{/S07}

INGREDIENTS

Water, Sodium ascorbyl phosphate, Propylene glycol, Ethoxydiglycol, Citric acid, Glycerin, Peg 35 castor oil, Fragrance, Tocopheryl acetate, Phenoxyethanol, Sodium benzoate, Camellia sinensis, Sodium hyaluronate, Ferulic acid, Caprylyl glycol, Sodium EDTA, Xanthan gum, Pullulan, Selenomethionine.

DESCRIPTION

ANTI-POLLUTION SERUM^{/S07} is ideal for sensitive skin,

Contents, among others, 10 % of vitamin C and 0.5% of ferulic acid, which contributes to enhance protection against environmental damage caused by free radicals that can contribute to atmospheric aging and at the same time improves skin elasticity. That combination increase the efficacy of vitamin C up to eight-fold.

That mixture of actives provides unprecedented results and helps to prevent skin aging and wrinkles. It is useful for the reduction of acute and chronic photo-damage.

Neutralizes free radicals, gradually improves the skin's softness and tone. Improves the appearance of fine lines, wrinkles and loss of firmness, while brightening the skin.

FLASK 30 ML Ref: 160756

GEL PEELS

10% LACTIC GEL^{/29}

INGREDIENTS

Water, Lactic acid, Triethanolamine, Caprylyl glycol, Hexylenen glycol, Glycyrrhiza glabra, Camellia sinensis, Kojic acid, Phenoxyethanol, Hydroxyethylcellulose, Sorbic acid.

DESCRIPTION

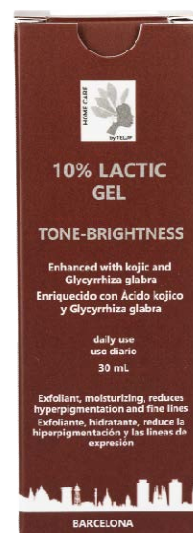

Lactic acid is one of the gentler acids and is ideal for young people and those with dry or sensitive skin.

10% LACTIC GEL^{/29} can help to improve hydration and increase the absorption of topically applied creams and serums. Infused with Kojic acid, which inhibits melanin, and can help face the appearance of freckles, age spots, stretch marks, and other dark pigmentation on skin.

Glycyrrhiza Glabra extract provide additional natural brightening properties

Good for daily use and maintenance.

FLASK 30 ML Ref: 160060

10% MANDELIC GEL^{/46}

INGREDIENTS

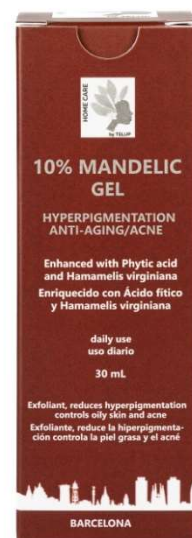

Water, Mandelic acid, Triethanolamine, Ethanol, Isopropyl alcohol, Hamamelis virginiana, Matricaria recutita, Phenoxyethanol, Phytic acid, Hydroxyethylcellulose, Sorbic acid.

DESCRIPTION

Mandelic acid is an Alpha Hydroxy Acid (AHA) obtained from almonds.

10% MANDELIC GEL^{/46} contains mandelic acid that breaks the union between corneal cells removing aging cells, debris and pollutants. The combination with phytic acid allows increasing the skin tone and the presence of hamamelis virginiana provides astringent properties that tightens the pores and helps to control the hormonal breakouts.

FLASK 30 ML Ref: 160534

10% SALICYLIC GEL^{/59}

INGREDIENTS

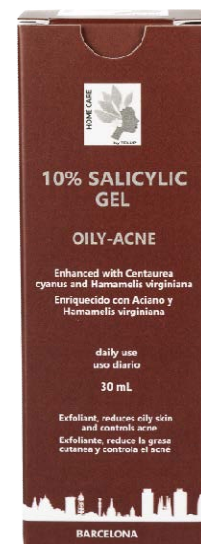

Water, Isopropyl alcohol, Propylene glycol, Salicylic acid, Polisorbate 20, Hamamelis virginiana, Centaurea cyanus, Hexylene glycol, Hydroxyethylcellulose, Sodium hydroxide.

DESCRIPTION

This solution contains highly effective salicylic acid as an agent to remove aged cells, oil and debris stuck to the surface of the skin that cause breakouts. It is one of the most effective substances to combat excess fat production as well as to rejuvenate the skin.

10% SALICYLIC GEL^{/59} helps to detoxify stressed skin while unclogging pores. The combination of Centaurea cyanus and Hamamelis virginiana provides anti-inflammatory and astringent activities that have been shown to be effective in closing pores and helping to reduce acne breakouts.

FLASK 30 ML Ref: 160695

10% GLYCOLIC GEL^{/70}

INGREDIENTS

Water, Glycolic acid, Triethanolamine, Panthenol, Aloe barbadensis, Matricaria recutita, Hexylene glycol, Retinyl palmitate, Phenoxyethanol, Hydroxyethylcellulose, Sorbic acid,

DESCRIPTION

This rejuvenating gel based on the skin-renewing properties of glycolic acid uses chamomile extracts for their powerful anti-oxidant and anti-inflammatory benefits. Also, retinol (vitamin A) works behind the scenes on the lower levels of skin to improve elasticity and skin texture by promoting collagen stimulation and removing dead skin cells.

Aloe helps to provide added anti-inflammatory, humectant and smoothing properties.

This gel penetrates the epidermal layers of the skin to help reduce the appearance of wrinkles, uneven texture, and other signs of aging

FLASK 30 ML Ref: 160725
